

Assessment 5

Total Marks: 30

Q.1 Short Questions:

(24)

- i. How important it is for a designer to know about the function of a room before decorating it? What questions would you ask your client to establish the purpose of the living room before decorating it?
- ii. How can a focal point be created in a room by using mirror?
- iii. What type of cushions should be used for children's rooms?
- iv. Why it is important to draw a floor plan for a room before buying furniture?
- v. When two people share a room and they both have totally different tastes, how would you solve the problems relating to colour, pattern etc.
- vi. How important is it for the en suite bathroom scheme to relate to the adjoining room's scheme?

Activity

(6)

- List things that you have in your bedroom and those that you would like to have?
- Measure your bedroom and convert these measurements to scale.
- Do you have enough storage space in your bedroom?
- If you were asked to create some more storage space, how would you manage to do this?
